OVERVIEW

As a software developer based in Nigeria, I have experience building websites and applications with JavaScript, React, Redux, Express, NodeJs, Tailwind, and MongoDB. With the tools I have, I have built software that actually creates real-life solutions to unresolved problems. I am very capable of learning new skills quickly and am happy to work in any environment.

My strongest suits are on the front end. I have good commercial experience in this area, with a keen interest in expanding my skillset in a diverse range of technologies.

SKILLS

- Strong experience with JavaScript.
- Proficient with CSS, SCSS, and Tailwind. Familiar with design tools such as Figma, Adobe XD, Canvas, Adobe Photoshop, and Adobe Premier Pro.
- React and Redux have good skills in this area. A clear understanding of statement libraries (e.g., Redux and Redux-toolkits)
- Familiarity with Express.js and MongoDB
- Good at using the Linux/Debian operating system.

PROJECTS

Tickety (In progress)

The Tickety project centers around a web app for purchasing movie and concert tickets, with a focus on delivering a user-friendly experience for my client's fans and customers.

Apple Watch Series 2

It a single web page designed with Tailwind CSS, a utility-first workflow and with React-vite. The User Interface (UI) was gotten from Dribble.com.
